CHAPTER- 1

OVERVIEW OF THE DISTRICT

1.1 General Description of District:

The name LAKHIMPUR is believed to have originated from the word “Lakhimi”, the Goddess of Prosperity. The economy of the district is agrarian and people mainly depend on agriculture. Lakhimpur therefore, means full of paddy or the place where paddy is grown abundantly. Besides the soil of the district is alluvial and fertile for which crops flourish without use of any artificial manure or hard labour. Over and above fish, meat, vegetables, milk is abundant in the district. Others say that the word originated from Lakhmi Devi, the mother of Bhuyan Raja who was the descendant of King Arimatta. As per Lakhimpur District Gazette (1976:4) the district was notified as Lakhimpur District through a proclamation issued by then Governor General in July, 1839. On 2nd October, 1971, the district was recognized with two sub-divisions viz, Dhemaji and North Lakhimpur. Later it was again reorganized in the year 1980 with Co District Dhakukhana leaving Dhemaji as a separate district.

The District was earlier regarded as “Kaliapani” because there was practically no road communication to this district till, 1950. In the year 1954 the temporary Aerodrome became operational. From 1957 the Assam State Transport Cooperation buses started plying from Lakhimpur. And from 1963 the North East Frontier Railway started train service from this district.

1.2 Location:

Lakhimpur District is situated on the North East corner of Assam. The district lies between 26°48' and 27°53' northern latitude and 93°42' and 94°20' east longitude (approx).

1.3 Boundary:

It is bounded on the north by Lower Subansiri and Papumpare districts of Arunachal Pradesh and on the east by Dhemaji district and Subansiri River. Majuli district stands on the southern side and Gohpur of Biswanath district is on the west.

1.4 District Disaster Management Authority

The District Disaster Management Authority, Lakhimpur was constituted as per provision of Section 20(1) of National Disaster Management Act 2006, as follows:

1. The District Commissioner- Chairperson
2. Chairperson, Zilla Parishad- Co-Chairperson
3. Addl. District Commissioner, Disaster Management, C E O – Member Secretary.
4. Senior Superintendent of Police- Member
5. Chief Medical Officer- Member
6. Executive Engineer PWD - Member
7. Executive Engineer, Water Resources – Member

Besides the above, the Heads of all departments concerned with the management of disasters in the district such as Civil Defence, Food & Civil Supplies, Agriculture, Panchayat & Rural Development, Power, Irrigation, and Sports & Youth Welfare will be special invitees to all meetings of the District Disaster Management Authority.

The Committee shall discharge all functions as laid down in the National Disaster Management Act, 2006.

1.5 Administrative setup:

CHAPTER 3
FLOOD PRONE VILLAGES IN LAKHIMPUR DISTRICT

In Lakhimpur district there are ten major rivers viz, the Brahmaputra, Subansiri, Ranganadi, Dikrong, Singra, Pabho, Boginadi, Kakoi, Durpang and Sessa Pichala. All these rivers flow through the Arunachal Himalayan region before entering the plains of Lakhimpur district, as a result of which there are steep gradients and deep gorges in their upper catchment areas resulting in large amount of runoff that comes downstream carrying huge amounts of silt and sediments resulting in flash floods in the plains of Lakhimpur district.

It refers to action taken in the after math of a disaster to enable basic services to resume functioning, assisting victim's self-help efforts to repair physical damage, restore community facilities, revive economic activities and provide support for psychological and social wellbeing of the survivors.

During post flood period water born disease and Vector born disease may increase. Regular supervision and health camp will be done by respective Block PHC in collaboration with IDSP and NVBDCP. PHE have great role in arranging safe drinking water and sanitation in flood affected area.

9.2 Water Resources Division, North Lakhimpur

North Lakhimpur Water Resources Division deals with flood and erosion problems, a major service required in the Lakhimpur District of Assam. This Division maintains the embankments which are under its jurisdiction. The jurisdiction of North Lakhimpur W.R Division covers the Bihpuria LAC, Ranganadi LAC, Nowboicha LAC & Lakhimpur LAC covering river Subansiri (right bank and some reaches of left bank) in the east and the river Pichala in the west. It is bounded by the hills of Arunachal Pradesh in the North and the Brahmaputra and the Subansiri in the south.

This Division consists of 3 (three) Subdistricts. They are:

1. Lakhimpur-Ranganadi Water Resources Subdistrict.
2. Nowboicha Water Resources Subdistrict.
3. Bihpuria Water Resources Subdistrict.

The important rivers under the jurisdiction of the North Lakhimpur Water Resources Division are:

- 1) Subansiri, 2) Ranganadi, 3) Kakoi, 4) Singra, 5) Boginadi, 6) Dirgha, 7) Pabha,
- 8) Brahmaputra, 9) Subansiri, 10) Dikrong, 11) Durpang & 12) Pichala (Sessa).

The jurisdiction covered by the Subdistricts are as follows:

1. Lakhimpur-Ranganadi Water Resources Subdistrict: Lakhimpur & Ranganadi LAC
2. Nowboicha Water Resources Subdistrict: Nowboicha LAC
3. Bihpuria Water Resources Subdistrict: Bihpuria LAC

A major part of the embankment system under the North Lakhimpur Water Resources Division was constructed in the year 1955-56. As such the life of the embankment system as per design has already passed away where no major widening & strengthening work has been taken since then. Three major schemes under FMP have been taken up for raising and strengthening along with anti-erosion works in the river basin at Ranganadi, Dikrong & Durpang and work is physically completed in 2020. Major widening and strengthening along with anti-erosion work at the vulnerable reaches has been taken up from March 2024. Major repair and maintenance work of the other dykes is required to be taken up under the North Lakhimpur W.R. Division. The benefited area of different dykes are as follows.

Sl. No.	Name of river	Length of embankment	Benefitted area
1	The Brahmaputra	26.10 Km	11,094 Hectares
2	Subansiri	47.70 Km	13,341 Hectares
3	Other tributaries	260.283 Km	57,460 Hectares
	Total =	334.083 Km	

With a view to taking timely and effective measures on emergency flood situation, constant vigil will be kept over the whole embankment system by the field staff of this division.

During the flood season, the water level of the Brahmaputra and its main tributaries will be observed at some key points. They are stated below-

Sl. No.	Name of river	Gauge site	Danger level
1	The Brahmaputra	At 23 rd Km (Jamuguri)	79.30M
2	Subansiri	i) At 20 th Km (Dhalghat)	90.40M
		ii) At Ghanchari	87.60M
		iii) At Silikhaguri	80.60M
3	Ranganadi	At Railway Bridge	95.02M
4	Dikrong	At Sissapathar RCC bridge	86.60M

The water levels and rainfall data will provide useful advance warning about the flood to facilitate preparedness, mitigation, and resilience without relying on physical infrastructure.

Flood Warning: To keep all flood information such as flood situation from time to time a control room will be functioning in the office of the Executive Engineer, North Lakhimpur Water Resources Division, North Lakhimpur with effect from 1st May/2026 and up to 31st October/2026. The In-Charge in the rank of A.E. or J.E. of the technical branch of the North Lakhimpur Water Resources Division will also be the In-Charge of the Control Room. The control room will be functioning on shift duty basis with departmental staff and the flood level of different rivers including all urgent flood messages will be recorded in the control room. This data will be transmitted to the higher authority of the Department, District Civil Administration by the in-charge of the control room periodically.

The Departmental telephone No. 03752-222144 will be installed in the control room of North Lakhimpur Water Resources Division.

The embankment system under North Lakhimpur Water Resources Division is as follows: -

IDENTIFICATION OF WEAK AND VULNERABLE EMBANKMENTS/FLOOD PRONE AREAS

Name of Division: - Dhakuakhana W.R. Division

Sl No	Name of Embankment	Name of river & Location	Condition of the embankment	Remarks
1	Brahmaputra dyke from Sissikalghar to Tekeliphuta	River: Brahmaputra Bank erosion in between Bahir Bogori to Takarchuk area	The embankment is reasonably good. But, bank erosion occurs during the flood period.	The embankment is around 350 m away from the river.
2	Korha R/B embankment from Gopalpur to Baliyani (Tenga Am BeelGhilamaraBund)	River- Korha Inadequate Section from Ch. 13200 m to 13500 m	The embankment is reasonably good.	Inadequate Section from Ch. 13200 m to 13500 m
3	Korha L/B from Bhagamukh to Moukhowa	River -Korha Inadequate section from Ch. 12550m to 19150m	The embankment is inadequate to withstand flood at several reaches from Ch. 12550m to 19150m	One scheme under SOPD-G 2025-26 has already been sanctioned for raising and strengthening of the embankment from Ch. 12550m to 19150m. The work will be executed after the flood season.
4	Subansiri L/B dyke from Gogamukh to Selamukh	River = Subansiri	The embankment is reasonably good.	The river is 5.00Km away in average from the embankment
5	Sampora L/B Dyke from Gurathali Chapori to Dhakuakhana PWD Road	River = Sampora	The embankment is reasonably good.	One PDNA scheme and one SOPD-G scheme is going on for strengthening the embankment
6	Ch. 2900.00m of Korah dyke to Balipukhuri Nath Gaon embankment	River Sampora	The embankment is reasonably good.	Newly constructed embankment
7	Charikoria L/B dyke from Ghilaguri to Rounabari	River = Charikoria Bank erosion in between Ch. 400m to 1000m	The embankment is reasonably good.	Newly constructed embankment

ACTION PLAN:**Key Points:****A. Pre-Flood and During Flood:****i. Stocking of Flood Fighting Materials:**

Flood fighting materials such as geo-bags (Type-A, Type-B, Type-C), geo-sheets, empty sandbags, and PSC porcupine members will be collected and stocked before the flood season from the departmental central store.

ii. Activation of Flood Monitoring in All Flood-Prone Areas and Information Capture through Flood Bulletins:

Flood-prone areas will be monitored regularly throughout the entire flood season, and necessary remedial measures will be taken if any problems arise. The departmental site in-charge, along with field staff, will maintain constant vigilance round the clock during high flood stages. Daily information on flood damage and water levels will be sent regularly via email and WhatsApp to the competent authority. Senior officers will visit the sites from time to time if major problems arise, and appropriate measures will be taken as per instructions to ensure the safety of the embankment.

iii. Establishment of Coordination Linkages with Village Teams for Embankment Strengthening and Safety:

Village-level coordination teams will be formed on or before 30th April 2026 to identify the most vulnerable reaches during high floods. These teams will help provide information to the concerned departmental officers regarding issues such as boiling, seepage, leakage, and overtopping during high flood conditions. The committees will also assist in providing necessary labor and materials during emergencies to safeguard the embankment from breaches. If the dyke is threatened and becomes endangered, immediate measures will be taken round the clock to prevent possible breaches and flood damage.

iv. Divisional Control Room:

A- Divisional Control Room will be set up to receive and transmit flood-related information, including water levels of various rivers under the Dhakuakhana W.R. Division. The control room will function round the clock from 1 May 2026 to 31st October 2026.

B. Post-Flood Period After the flood period is over, vulnerable and damaged reaches will be identified, and detailed surveys will be conducted. Based on these surveys, necessary estimates will be prepared under various heads of account and submitted to the competent authority for approval and sanction. This will ensure that required schemes are implemented before the next flood season to enhance the safety of the embankment.

9.4 AGRICULTURE DEPARTMENT:

Lakhimpur district is situated in the North Bank Plain Zone of Assam experiencing a very heavy rainfall in the monsoon season. Flood is regular feature in Lakhimpur district which generally occurs in between mid of May -Sep with the onset of monsoon. About 30361 Ha of crop land is chronically affected by flood every year in the district, resulting in submergence of various crops like paddy, vegetable, sugarcane etc. Heavy rainfall generally occurs during the month of June to August within an avg. 2190 mm but it may advance to April -May. Rainfall in the neighbouring state of Arunachal Pradesh also contributes to the occurrence of flood in the district, next to flood occasionally drought like situation & hailstorm may also create a great havoc to the farming community of the district.

OBJECTIVE OF THE DEPARTMENTAL DISASTER MANAGEMENT PLAN

The main objectives of the departmental disaster management plan are

1. To minimize crop loss from natural disaster
2. Preparedness & prevention from crop damage.
3. To make aware the farmers about natural disaster through awareness & training camp.
4. To compensate the economic loss of the farmers through extensive Rabi Crop cultivation.
5. To ensure quick & effective response during disasters to minimize/quick recovery, restoration & rehabilitation of crop growth & productivity

CHAPTER 2: HAZARD & VULNERABILITY SCENARIO FLOOD AFFECTED ZONE OF LAKHIMPUR DISTRICT

Zone	Agril. Sub-division	Development Blocks
Zone No.1	Dhakuakhana Agril. Sub-Div	Dhakuakhana & Ghilamora
Zone No.2	North Lakhimpur Agril. Sub-Div.	Nowboicha, Lakhimpur, Boginadi, Ranganadi
Zone No.3	Narayanpur Agril. Sub-Div	Karunabari, Bihpuria & Narayanpur

Among the natural calamities flood has been the chief visitor to the district. Heavy rainfall on the hills of Arunachal Pradesh and flood water of river such as Brahmaputra, subansiri, Ranganadi, Dikrong, Kakoi, Charikaria, and their tributaries flow carrying the flood water. Generally flood occurs three times in this district 1st flash in April-May, 2nd flash in June-July & 3rd Flash in Aug-Sept. Flood remains about 10-20 Days in many parts of the district and causes damage to the life and property, and also to the crop field affecting food security to the affected people. From this agriculture point of view, the first flash of flood of the year 2025 i.e, June- July causes heavy damage to the crop fields.

NATURE OF DAMAGE:-

1. Incidence of pest & disease to the standing crop that escaped on reexisted flood.
2. Damage of upland non paddy crops like vegetables, pulses, banana, fruits crops & other Horticultural crops.

3. Damage of paddy seedlings/paddy crops at tillering stage of medium and late duration paddy.
4. Causes sand and silt deposition to the affected field.
5. Erosion of cultivable land.

Mid-season flood usually affect the most of the crops at mid growth stage causing damage depending upon the submergence. Upland paddy at maturity stage has to be harvested from the standing flood water in the field. Some important pest like stem borer, gall midge, hispa, leaf roller & grass hopper & swarming caterpillar are main problematic pest in rice crop in floods affected areas. Moreover, diseases like sheath rot & bacterial leaf blight and blast are common diseases found in paddy field after flood for this, appropriate plant protection measures have to be taken to save the standing crop. Seed treatment & use of resistant varieties in the flood affected areas is very important like Prafulla (60 Days), Gitesh(60 Days), Luit, Kapilee,Dishang (65 to 70).

SOME GENERAL STRATEGIES ADOPTED FOR PEST & DISEASES CONTROL

1. Surveillance in pest prone areas.
2. Monitoring the major pest like swarming caterpillar, blast, bacterial leaf blight of paddy, cut worms in pulses.
3. Necessary pesticide are provided to counterpart pest & disease attack.
4. Capacity building of field functionaries & farmers on a regular basis.
5. To build up season specific pest map on endemic areas.
6. Depending upon the pest attack the prophylactic /community pest control measures through affected farmers and the field functionaries under the expert supervisions of specialist/Scientist of RARS or KVK.
7. Plant protection equipments are being made available to the farmers at free cost/subsidized rate.

MAIN TASK OF THE DEPARTMENT AND RESPONSIBILITIES

1. Pre Disaster
2. During Disaster
3. Post Disaster

1. Pre Disaster:

1. Publicity & Awareness : Awareness cum training camp will be organized after completion of the Model Code of Conduct for Assembly Election, 2026 in the flood affected villages by the field staff to make the farmers aware about the upcoming flood. Farmers will be advised how to cope with the havoc of flood /drought and what action is to be taken in case of such disaster. Farmers will be suggested to raise seed bed in high land & in community basis, so that the seedling is not damaged by the flood. In general varieties of the Rice are mainly affected by flood during June-August. Farmers will be advised to use short duration high yielding varieties of rice which can be transplanted late after the flood in the month September.

2. Buffer stocking seeds: It is proposed to have buffer stock of paddy seeds in the district as well as sub divisional HQ for immediate utilization as relief to the flood affected farmers. The paddy seeds of the both HYV & Local varieties of short & long duration will be selected.

3. Raising of Community Nursery: Raising of Sali seedling at community nursery is proposed nearby flood affected areas to distribute seedling to the needy flood affected farmers.

2. During Disaster:

During disaster time all field staff & HQ staff will be at their respective sites & keep constant eye in the vulnerable area. Control room will be open at both district & sub division HQ with a 24 hours service to help the affected farmers & also to guide the grass root level workers. Any submergence & damage in field crops will immediately be reported in the control room for immediate information to the district administration. For any emergency relief measures they will intimate the concerned revenue circle officer. They will also help the civil administration for any relief works in the flood affected areas at any moment. During flood farmers will be motivated to raise their Sali paddy seed beds in high land free from flood.

3. Post Disaster:-

1. **Distribution of Short duration varieties of rice:** If the flood is over in the first part of September it is proposed to distribute seed of some short duration varieties of rice like Luit, Kapili etc. in the flood affected villages to compensate the loss to some extent.
2. **Distribution of excess seedlings:** After the flood, it is proposed to arrange distribution of seedlings to the needy farmers which might be available with some farmers as surplus.
3. **Distribution of seedlings from community nursery:** It is proposed to distribute Sali paddy seedling produced in the community nurseries after the flood to the needy flood affected farmers.
4. **Arrangement of nutrient feeding:** Paddy field survived after flood can be top-dressed with chemical fertilizer viz. Urea & MOP @4Kg &3Kg/Bigha respectively which will help in maintain plant health & thereby increasing productivity.
5. **Plant protection Measures:** After recession of flood water, the surviving/standing crop might come under the attack of various pest which might result in severe damage to the crop. Therefore, it is proposed to provide plant protection chemicals at 100% subsidy to the small & marginal farmers affected by flood.
6. **Distribution of pulse & paddy seeds:** If the flood occurs within the normal stipulated period & if the paddy seedling cannot be transplanted after receding of disaster, it is proposed to distribute seeds like blackgram & green gram to compensate the loss.
7. **Distribution of Rabi seeds:** The most effective post disaster measure in agriculture sector is the extensive cultivation of Rabi crops in the flood affected areas. Therefore, it is proposed to go for cultivation of Rabi crops to compensate the loss due to disaster in kharif season. For this Seeds of crops like Mustard, pea, lentil, potato, Maize, summer paddy have been proposed for free distribution in affected villages of the district.
8. **Free Tractorization:** It is proposed to go for free tractorization to the affected small & marginal farmers, so that targeted area may be achieved in stipulated time & minimize the cost of cultivation.
9. **De-siltation:** In silt/Sand deposition areas programme for removal of sand & silt will be proposed to convert the land in to cultivable one.

POST DISASTER RECOVERY PLAN:-

As action plan has been prepared at District level, estimating the total flood damage and total fund required to rehabilitate the flood affected areas. A model action plan is attached herewith.

Sl no	Activity	Requirements	Area to be Covered (ha)	Fund requirements (in Lakhs)	Nos. to be benefitted	Remarks
1	Community nursery	150 ha	1500 ha	75	6000	Prepared before flood
2	Fipronil- for pest outbreak	4000 Litrs.	Need based	16	Need based	During & after flood
3	Sprayer	1000 nos	Need based	9	Need based	
4	Rabi Seeds distribution					Post flood situation
5	Black gram	600 qtls	3000 ha	42	7690	
6	Rape & Mustard	400 qtls	4000 ha	28	8000	
7	Vegetable kit	8000 kit	2400 ha	120	8000	
8	TOTAL		10,900	290		

PHASE WISE DESCRIPTION OF DEPARTMENTAL RESPONSIBILITIES / ACTIVITIES.

1. Establishing coordination in implementing & providing technology know how on flood management to the farming community through agricultural extension services.
2. Create assured irrigation facilities and availability of water to the agricultural fields.
3. Continue educating farmers on soil & water conservation technologies for implementation of watershed projects & know how on drought/flood resistant crops.
4. Implementing calamities (like flood/drought etc.) relief programmes.
5. Assess damage to crops & allied infrastructures in case of disasters.

PROGRAMME PROPOSED WITHIN ROUTINE DEPARTMENTAL WORKS FOR DISASTER PREVENTION AND MITIGATION AND STRATEGY FOR ITS SUCESSFUL IMPLEMENTATION**1. Preparedness**

- (i) Undertake skill up gradation of department staff & farmers
- (ii) Prepared district wise preparedness plan to manage flood and drought etc.
- (iii) Generate awareness on hazards, weather monitoring & suggest actions.

Flood Control Room & Duties assign for control room :-

Flood Control Room will be activated from 1st May 2026 to till the end of the flood at each Agril. Sub-Division as follows -

	Name	Contact no
District Nodal Officer	Deep Jyoti Chutia	8486192073
Narayanpur Agril. Sub-Division	Pradip Hazarika, AI	9101478225
Dhakuakhana Agril. Sub- Division	Sushil Baruah, AAI	9365766838
Lakhimpur Agril Sub Division:	Baharul Islam, AI Nipen Dutta, AAI	9854493653 9954409987

Overall Structure and activities assign :**ADO Circle Level:**

ADO, AEA, PRI, GB. They will report to SDAO within 12 hours of flood started with a copy to the CO (Rev).

SDAO Level: Overall In charge-SDAO

AI, AAI will compile the ADO's report and will be forwarded to DAO within 6 hours of received.

DAO Level: Nodal officer flood (overall In charge), SDAO (HQ) , Sr ADO (Agro), AI, AAI, will compiled the report of SDAO and immediately will be submitted to the District Commissioner with a copy to the Director of Agriculture.

2. Prevention & Mitigation:

- i. Drought/Flood monitoring system
- ii. Pest & disease monitoring system
- iii. Provide information to undertake crop insurance- Pradhan Mantri Fasal Bima Yojona

3. Alert & Warning stage:

- i. Identify storage/godown for early harvest.
- ii. Establishment of early warning mechanism.
- iii. Gather information related to warning of impending floods, drought or pest attack.
- iv. Take necessary precaution including moving of farm equipments/tools to safe location.

4. Response:

- i. Estimate needs for recovery
- ii. Discuss with farming community to agricultural extension cell and support to conduct cleaning operation (to avoid long term water logging & salinity)

5. Recovery & Rehabilitation

- i. Provide technical support to prevent further damages and help restart agriculture.
- ii. Quantity ton estimate due to the event and suggest remedial measures.
- iii. Depending on the intensity of the damage establish a programme for agriculture rehabilitation.
- iv. Ensure farmers are connected to the market.
- v. Equip farmers with knowledge to deal with hydro meteorological and climate related disasters.

DEPARTMENTAL CAPACITY BUILDING POLICY FOR DISASTER MANAGEMENT

In order to accomplish relevance, a set of action is required to enhance the capacities of the communities. This includes ability to recognize the hazard understand appropriate action for mitigation and response & communication with the larger society. The task in hand of the administration is to maximize the coverage of population that are at risk and develop mechanism to keep constant engagement in disaster management for community in order to prioritize action. Capacity is enhanced through focused targeted means of education & training and practice through drills. The pedagogy, content of packages and approach of delivery will depend on range of parameters including geographical, social, economic & cultural aspects.

Review, up gradation, dissemination of DM Plan

Disaster management plan is a living document. It has to be updated on the basis of availability of resources as well as magnitude of the probable of the disaster. Innovation & change in organizational structure also require review of the DM plan. New suggestions from knowledge bank/Experts/nodal agency need also to be incorporated time to time.

9.5 Public Health Engineering Department, Lakhimpur / Ghilamara:

Lakhimpur PHE Division has the following two sub-divisions under its control:

1. N.Lakhimpur PHE Division.
2. Ghilamara PHE Division.

- ◆ At the helm of the relief works will be the two Executive Engineers who will control the activities from their respective Divisional HQ, i.e. N. Lakhimpur and Ghilamara.
- ◆ The division office will guide and monitor the activities of the sub-divisions, and submit action-taken report relating to flood relief measures to The Deputy Commissioner, Lakhimpur after receiving the same from the sub-divisions. Besides, the division office will be in charge for removing bottlenecks that may crop up while taking up flood relief measures. The division will also take up the matter for arranging materials such as bleaching powder, alum and lime etc. with The Deputy Commissioner, Lakhimpur and the Chief Engineer (PHE), Assam.
- ◆ Disinfections of spot sources and distribution of purifier packets will be the areas where the department will exert maximum stress, and accordingly necessary action will be taken during and after flood. Departmental staff will be engaged for this purpose. Disinfections will be carried out by departmental staff as well as private sources. Motivating the people to exercise proper disinfections and hygiene practices for drinking water and taking food, will also be another thrust area for the department during flood. Distribution of leaflets containing disinfections and hygiene practice rules and use of Public Address (PA) system in this regard will be carried out depending upon the situation at hand.
- ◆ Since this Department is concerned with fresh drinking water supply, they should take proper steps for providing pure drinking water to the flood affected people. They should keep ready stocks of Hand Tube- well as required which are to be provided to the affected villages. Chemical treatment of water ponds, ring wells tanks should be taken care of by this Department. The EE, PHE Ghilamara Division is asked to submit the list of pinpoints of HTWs installed in the probable affected areas.
- ◆ Control Room will be operating at both the Divisions.

Carcass disposal:

1. Standard of deep burial method:

Requirement:

- Spade /hoe
- Excavators.
- Kerosene/Phenol/ Salt
- Bleaching powder or calcium hydroxide.
- Galvanized iron or wire meshes.

Method:

1. A pit or trench should be dug about 2 meters deep. (Carcass should be carried to the burial place by trolley, never by dragging)
2. Top 5 cm soil from where dead animal was lying should also be buried.
3. In order to make it unpalatable, drench kerosene, phenol.
4. Bleaching powder or calcium hydroxide - layered upon the dead animals to keep insects away.
5. It must be ensured that animals do not have any access to burial sites.

Nodal Officer: - Dr. Golap Baishya, 8011462992

C. Resource Inventories available along with their departments with status: -

i). Medicine available: -

D. Search and Rescue equipment with details status: -

- 1) Eight nos. of Mobile Veterinary Ambulances are available in the district.

Assistance for loss of milch and draught animals- The assistance will be subject to a ceiling of 3 large milch animals and/ or 30 small animals or 3 large draught animals and/ or 6 small draught animals per household irrespective of whether a house has lost a large number of animals.

- i) For milch animals-
Rs.37,500/- for Buffalo/ Cow/ Camel / Yak / Mithun etc.
Rs. 4000/- for Sheep/ Goat/ Pig
- ii) For draught animals-
Rs. 32,000/- for Bullock/ Camel/ Horse etc.
Rs 20,000/- for Heifers / Calf / Donkey / Pony / Mule
- iii) For poultry-
Poultry @ Rs.100/- per bird subject to a ceiling of an assistance of Rs.10,000/- per beneficiary household.

Challenges & Requirements:- □

- Need transport/boats during flood
- Additional medicines as medicine stock is very low
- Temporary cattle shelters □ Fodder support □
- Extra manpower □
- Emergency fund support □

Fuel for vehicle to perform flood duties

9.8 IRRIGATION DEPARTMENT, LAKHIMPUR:**Name of the Division: Lakhimpur Naoboicha Bihpuria Division (Irrigation)**

The total geographical area of the Lakhimpur district of the state of Assam is 2277 sq. km out of which the total cultivable area is 1,62,700.63 hectares. The district forms a part of vast alluvial plain of Assam, with a characteristics fertile land, laid down by the river 'The Brahmaputra' and its tributaries. The area covering the district is located between 26°48'N and 27°53'N latitude and 93°42' E and 94°20' E longitude. There are two civil subdivisions, namely North Lakhimpur and Dhakuakhana and nine Community development blocks in the district.

The project formulation and implementation team in all the development Blocks of Lakhimpur district barring Boginadi, Ghilamara and Dhakuakhana comprises the Executive Engineer, Dhakuakhana Division (Irrigation), Dhakuakhana and his team of Engineers. All the works of other six block will be executed by the Executive Engineer, Lakhimpur Naoboicha Bihpuria Division (Irrigation), North Lakhimpur.

The Superintending Engineer, Lakhimpur circle (Irrigation) North Lakhimpur is the district administrative head of the department to monitor the execution of the project. All the technical guidance for formulation and implementation of the projects are given by the Superintending Engineer. The state level, the project is monitored directly by the Chief Engineer, Irrigation through the monitoring and quality control cell of the department. In all technical issues relating to formulation, implementation and monitoring of the project, the Chief Engineer is the final authority in the state who is controlled by Secretary to the Govt. of Assam, Irrigation Department. Besides these, the execution of the project is also monitored in the district level by the Deputy Commissioner, Lakhimpur, North Lakhimpur.

1.2 Objective :**The main objectives of the Flood preparedness are as follows:**

- To create the public awareness about the Flood
- To create the sense of the duties and responsibilities of the field level functionaries during pre- flood, during flood and post- flood stages so that there is minimum risk for the damage of lives and properties.
- To rescue and evacuate people, animals and properties during flood.
- To provide first aids to the injured.
- To take care of the children, women and disabled.
- To transfer the seriously injured and people require urgent medical attention to hospitals.
- To restore communication network and essential services.
- To clear debris blocking transportation.
- To provide shelter and relief to the homeless.
- To arrange for food and drinking water to the affected people.
- To dispose off the dead bodies and animal carcass to prevent the outbreak of flood.
- To take people to a safer place during flood.

2.0 Flood Scenario:

The Lakhimpur district is bounded on the North by Siang and Papum Pare district of Arunachal Pradesh, on the east by the Dhemaji district and the Subansiri river. Majuli and Jorhat districts stands on the southern side and Gohpur sub division of Sonitpur district falls to the west of Lakhimpur district. The following statistical data are outlined with reference to the geographical and flood prone areas of the district. The total geographical area of the district is 2277 sq. km out of which 2257 sq. km falls under rural area and the rest 20 sq. km is the urban area.

The floods affect almost all the districts of the state with the magnitude ranging from low to severe. The districts which are nearing the hilly regions and are comparatively situated at low levels from mean sea level are usually affected badly by the flood every year. Depending upon the geographical location of the state, flood becomes an annual phenomenon and almost the entire region except the hilly areas come into the grip of flood. The monsoon starts from late may or early June every year causing heavy down pour and floods.

Flood Hazard Affected Areas in Assam			
Hazard Severity	Flood Affected Area (Hectors)	% of Flood	
		(w. r. t. State Geographical Area)	(w. r. t. Total Flood Hazard Area)
Very High	1,28,687	1.64	5.79
High	2,24,629	2.86	10.11
Moderate	3,51,667	4.48	15.83

Low	4,91,761	6.27	22.14
Very Low	10,24,584	13.06	46.13
Total	22,21,328	28.31	100

Affected Area in %	Name of the Districts
0-10	Baksa, Chirang, North Cachar, KarbiAnglong, Kokrajhar, Tinsukia
10-20	Kokrajhar, Tinsukia
20-30	Cachar, Golaghat, Hailakandi, kamrup (M), Karimganj, Udalguri
30-40	Bongaigaon, Dhuburi, Dibrugarh, Goalpara, Kamrup, Sonitpur
40-50	Dhemaji, Jorhat, Nalbari, Nagaon, Sibsagar
50-60	Lakhimpur
60-70	Barpeta
70-80	Darrang, Morigaon

Besides the floods, the state is also posing a continuous threat from the other havoc creators i.e the earthquake. The state had witnessed 10 major earthquakes above the magnitude of 6 in the Richter scale, the highest during the year 1897 and 1950. In the recent past i.e 2004 to 2011, 14 earthquakes above magnitude 5 were recorded in the district. The state of Assam including the other states of North East India falls in the seismic prone zone V. Therefore, there is a need to be alert for saving our lives and properties during the disasters.

Erosion is generally associated with flood and creates major havoc along the banks of the Brahmaputra and its tributaries. Moreover, due to cloud burst, heavy rain and release of reservoir water from dams etc cause flash flood in the hilly areas, foot hills and urban localities without proper drainage arrangement. The Lakhimpur district also generally experiences strong wind/ cyclones during the month of March and April every year. Because of variability and climate change, drought also occurs more or less regularly in the rain deficit areas of the district. There is a risk of fire hazards and accidents due to the operational or human errors which also results in loss of life and properties. The tea garden areas in the district sometimes face the outbreak Acute Diarrhoeal Diseases (ADD) specially during the monsoon. The less social cohesion, unrest and unwillingness to up hold the human values may often lead to ethnic clashes/ riots etc. leading to the misery and loss of life and properties.

3.0 Main task of the Department:

The irrigation department is mainly responsible for supply of water to the crop fields of the farmers during Kharif, Rabi and pre- kharif season of the year. Therefore, the department undertakes the responsibility of creation and operation as well as maintenance of irrigation infrastructure in the state. The Lakhimpur Naoboicha Bihpuria Division (Irrigation) is responsible for creation of irrigation facilities in all the development blocks of the district barring Boginadi, Ghilamara and Dhakuakhana which is looked after by the Dhakuakhana Division (irrigation). The division therefore works on integrated approach with the agriculture department of the district. It regularly coordinates with the local district administration in the matter of progress and delivery of services to the public.

Earlier the role of the irrigation department in disaster management was confined to help the district administration in the relief and rehabilitation of the flood affected. With the expansion of the activities, the department has now redefined its role and stressed on pre- disaster preparedness. No separate budget has been provided for disaster management under Grant 30 of the state budget.

The irrigation department undertakes different measures at local, district and state level for transmission of knowledge to field level functionaries about the roles and duties during pre- disaster, post disaster and also during the disasters.

The irrigation assets are controlled and so operated in all the three stages in such a manner that the affects of the disasters are minimum. The public at large should always be protected by extending possible helps and services. The department always keeps in mind that the flood water smoothly passes down the canals at lower levels, therefore all the necessary measures are taken accordingly. Very often, the field level functionaries are deputed to the district administration for the rescue, relief and other essential services during all the stages of the disasters.

❖ Pre-Flood: Awareness, Training and Capacity Building:

The department undertakes training activities and capacity building measures to the field level functionaries at various levels. The training programme are conducted by the WALMIS and sponsored by the Govt. of India time to time as a part of their routine activities under annual action calendar. A few training programmes are identified under the irrigation sector by the WALMIS with an object to create awareness and enhance capacity building. These activities define the role of the field level functionaries in operation and maintenance of the assets. People's participation is also held at GP, Block, district and state levels involving the departmental personnel and N.G.O./ beneficiaries. Planning for the disaster preparedness and mitigation is made at division/ district level in convergence with the district administration. The status of the irrigation infrastructures is surveyed by the Executive Engineer and his team of engineers at pre- disaster stages and all the possible repair and strengthening works are taken up. As the monsoon season begins, instructions are passed to the Sub- Divisions and field level functionaries for taking flood preparedness and regulation of gates in the case of flow irrigation schemes and raising of bored pipes in the case of shallow/ deep tube wells.

❖ During Flood: Rescue, Relief, Essential Services and Others:

The role and responsibilities of the departmental response team at district level are furnished in **Annexure 3**. Main task of the department at district levels during any emergency situation (disaster) is to ensure:

- Regulation of the gates so that the flood water easily passes downstream of the canals.

- De- activation of the electrical installation.
- Shifting of the portable assets to a safe place.
- Help the district administration in relief and rehabilitation.
- Observe the flood and take immediate measures for the safety of the lives and properties. The central govt. has issued standard operating procedure (SOP) to tackle the emergency situation for different levels. Roles and responsibilities at state, block/ GP level of different departmental functionaries are furnished in the **Annexure 4**.

❖ **Post Flood: Repair of Departmental Infrastructure, Restoration of departmental Services and Others:**

The damage caused to the irrigation infrastructure are reported to the district administration and DDMA and with the approval of it, the proposals are submitted to SDMA for funding. As the funds are sanctioned, necessary repair and restorative work are taken up. The inter-ministerial wing of the Govt. of India conducts inspection and review of the damages caused due to flood. Technical support for repair of the irrigation infrastructure are made by the department at the state level.

4.0 Phase Wise Description of the Departmental Responsibilities:

(A) Pre- flood: The field level functionaries are given necessary training and instruction for their role and duties for regulation of irrigation projects at pre- flood stages. The gates are kept 24×7 when the floods are anticipated due to continuous rain during the monsoon. Sometimes depending on the situation, the electrical and mechanical installation are de- activated. In the case of STW/ DTW irrigation schemes, the pipes are raised above the anticipated flood water level. The pump house operators and the technicians are trained for repair and restoration of the electrical and mechanical installations. In the case of drought or drought like situation, a detailed contingency plan is worked out in consultation with the field level functionaries of the agriculture department to make use of the mobile hand pumps for exploiting the available surface and ground water source. Necessary training in this regard are given to the field level officers and staff of the department. The Water User Association are also taken into confidence in the planning process so that the plan works effectively in the case of drought. As the natural disaster in any forms can not be prevented, the effects of it may be minimized if cares are taken and sufficient awareness are made amongst the public. Actions in this regard are already being taken by the DDMA/ SDMA/NGOs etc.

(B) During the flood: District Nodal Officers/ District Control room will remain in contact with DDMA/ Nodal agencies for early warning of the disaster. On receiving the disaster alerts, District Nodal Officers will be informed through phone, e-mail and web- based SMS alerts.

District Level Nodal Officers will initiate action as per Action Plan and instruction of the District Administration.

On receipt of alerts from state/ district level the concerned officials will activate the response team and mobilize resources immediately for relief and rehabilitation work. The activities at district/ local levels are summarized and reported in the draft SOP.

The objective of having trigger mechanism for natural disaster is to have suo- motto activation mechanisms for spontaneous response to set in motion the command, control and management of the situation. The district engineer will prepare a list of engineering personnel of different categories already available in the district and a number of supporting staff in the case of outbreak of any disaster. Such list may be forwarded to the departmental authority and DDMA. This list will form the incident response team (IRT) at the field level.

On receipt of disaster warning from the DDMA/ District- Administration, the District Engineer will:

- Alert subordinate officers and staff for floods.
- Check vehicles, equipment, stores etc.
- Draw up tentative programme of action.
- Keep close touch with the district administration.
- Visit the affected areas immediately with the IRTs.
- Requisition of additional staff if required through SEs or Additional Chief Engineers.

The field level officials (AE/ JE) will report to the nodal officers at block level (AEE) who will report to the concerned BDO/ Circle Officer and District Nodal Officer (SE/ EE). The District Nodal Officer will report to the State Nodal Officer (CE) and the Deputy Commissioner.

During the disaster especially the flood, the control gates in the head works are kept open and constant vigil is maintained so that the flood water has the least effect on the lives and properties. The field level functionaries may be deployed for the relief and rescue operations as and when the district administration requires their services.

© **Post Flood:** The critical zones of the irrigation projects vulnerable to the flood or other natural havoc are identified and long-term permanent measures are taken up for its re- enforcement and improvement. A recovery plan is formulated for the repair of damaged infrastructures. The District Engineer will:

- Prepare a detailed estimation of the damage and submit the estimate for approval of DDMA/ SDMA.
- After sanction by SDMA, repair and restoration work are taken up.
- Arrange for awareness programme for extension of the benefits of the schemes from the restored infrastructures.

5.0 PROGRAMMES PROPOSED WITHIN ROUTINE DEPARTMENTAL WORKS FOR FLOOD PREVENTION & MITIGATION:

Our department is very much poor in infrastructure facilities for prevention and mitigation of flood. Therefore, a huge necessity is there to strengthen the infrastructure to be capable for mitigating or preventing disaster. But for this strengthening or developing of infrastructure a lot of fund will be required. As there is no special fund available in our department for this purpose till now. If possible, we will have to generate a new fund for this purpose discussing with the higher authority concerned.

6.0 DEPARTMENTAL CAPACITY BUILDING POLICY FOR DISASTER MANAGEMENT

Irrigation department has a mandate to create irrigation potential in the agriculture field throughout the state. With the guidelines of the GoI emphasis has been made at the state level for the capacity building of the departmental staff.,PRI, NGO and the Water User Association.

Many training institutes both central govt. and state govt. like the WALMIs and NIRD/SIRD etc. impart training program for the departmental officers and the farmers/ NGOs etc. Like other engineering department of the state, the irrigation department has also the same organizational structure. At district level the works divisions are headed by the Executive Engineer under the administrative control of the Superintending Engineer. Under each working division, the sub- divisions are headed by the Assistant Executive Engineer who controls the field level officers and the field staff.

Necessary capacity building measures are taken up in the form of transfer of latest knowledge and technologies related to the disaster management aspects by inviting resource persons for the field level functionaries/ projects units so that their duties and responsibilities are not compromised at all stages of the disasters. Thus, there is a regular interaction at the institutional, organizational and infrastructural levels. The administrative unit usually coordinates between the institutions and the field level functionaries level for regular update of knowledge and information. Efforts are maintained to create the least gap in the existing capacity. In order to provide instant relief to the victims, a fund-raising programme may be encouraged amongst the staff of the department including the voluntary wishers. Emergency kits containing immediate clothing, food or medicine may be provided to the victims by arranging temporary camps seeking assistants from the well-wishers, public and donors etc.

9.9. DHAKUAKHANA DIVISION (IRRIGATION), DHAKUAKHANA FLOOD PREPAREDNESS PLAN

There are 5 nos. Lift Irrigation and 1 No. of Flow Irrigation Schemes under Dhakuakhana Naoboicha Division (Irrigation), Dhakuakhana namely Jhalbari LIS, Sonari Chapori LIS, Dangdhara LIS, Bilmukh Patir LIS, Thekeraguri LIS and Poita FIS.

For the upcoming Flood season all the Section Officers and Section Assistants of the mentioned LIS are instructed to prepare for emergency situation as mentioned below:-

1. Instructed all the staffs of the schemes to be ready for any emergency situation.
2. Instructed to inspect the boulder pitching of the schemes if any erosion occurs.
3. Instructed to stock empty cement bags and sand and necessary equipments in their respective schemes to protect if any erosion occurs during the upcoming flood season.
4. Instructed to arrange lighting for observation at night.
5. Instructed to arrange emergency lights, candles, matchbox etc.
6. Instructed to keep all the gates of Cross Regulator open during flood season.
7. All AEEs are also instructed to inspect all the schemes frequently.

9.10 WOMEN & CHILD DEVELOPMENT DEPTT:

The SWD, Lakhimpur is well equipped with adaptive capacity like technology, infrastructure, information, skill, social capital to cope up with potentially hazardous situation. Through coordination with District Administration and convergence with the line Department, SWD Lakhimpur, plays an important role in relief & rehabilitation of the disaster ridden people. The frontline human resources of both the Health & Family Welfare Department departments particularly the AWWs, AWHs, ANMs & ASHAs work in tandem along with the community level committees such as the PRI member, Goan Burha Mothers Committees etc. to mitigate the situation.

The SWD Lakhimpur thrives to reach its target population and render services both before and during flood. The Integrated Child Development Services (ICDS) is implemented on-ground by field level functionaries – Anganwadi workers (AWW) and Anganwadi helpers (AWH) – who are trained to provide education, nutrition, and health services in a standardised manner. These well defined network of AWWs & AWHs provide the services rendered under ICDS to the beneficiaries both before, during and after flood. ICDS have very specific target group viz. the children up to six years of age, pregnant women, lactating mothers and adolescent girls and are the most vulnerable in the disaster situation.

In case of child protect Integrated Child Protection Scheme (ICPS) is implemented by setting up District Child Protection Unit (DCPU) as a fundamental unit at the district level. It is responsible for coordinating and implementing all child rights and protection activities at district

level and mainly deals with children in conflict with law and children in need of care and protection along with childcare institutions of the district in general.

6.1 Preparedness measures required to minimizing the impact of flood

The tentative measures to minimize the after effect of disaster can be achieved only through a trained and equipped team available within the department to deal with flood preparedness and response in a more organized and systematic manner. Tentative measures SWD Lakhimpur can adopt to ensure effective preparedness to respond to any disaster are given below :

6.1.a Pre Flood Situation

Sl. no	Pre disaster	Key persons
1.	Listing of AWC wise beneficiaries (PM, LM, children) along with the Divyangjan and senior citizens by CDPOs under their respective ICDS Project. So that adequate measures can be taken while shifting them from the flood affecting areas to safe shelter.	CDPOs
2.	Identification of flood prone areas and IEC : Identification of AWC situated at flood prone areas and are at high risk under the ICDS. Proactive measures can be taken to evacuate the AWC at the earliest when the water level rises in the nearby water source so that no damage is reported in stocks of AWC such TLM materials, Weight monitoring gadgets and the other essential equipments etc	CDPOs, Supervisors
3.	Mass awareness programme shall be conducted through different audio-visual media to help the community paint a clear picture and sufficient knowledge of the risks they might face during flood and ways to lower them.	CDPOs, Supervisor, AWW/AWH
4.	Psychological First Aid : Supervisors may be introduced to the concept of Psychological First Aid. They can act as a medium to support the psychological and social well being of the individuals during and after flood. Convergence with Health and Family Welfare Department is essential	Health and Family services, CDPOs, Counsellor of OSC
5.	Volunteers for Divyangjan and senior citizen: DSWO and CDPOs will depute AWW/AWH/volunteers of NGO to help the Divyangjan evacuate the flood affected area/home and relocating them to safe shelter/relief camps.	DSWO/ CDPO

6.1.b During Flood :

Sl no	During Flood	Key Persons
1	Listing of beneficiaries : The CDPOs will forward the list of beneficiaries along with Divyangjan, senior citizen, adolescent relocated to safe shelter/relief camp from the flood affected areas under a AWC and forward the same to the Circle Level Task Force for the supply of foods/edibles along with a copy to the O/o the DSWO Lakhimpur.	CDPOs, Supervisors and AWW
2	Breast Feeding Corner for Lactating Women : Breast Feeding is the safest option for feeding the infants during flood and displacement mainly for those who are being breast fed exclusively for the first month without any complimentary feeding. A separate corners will be set up in the relief camps to give the mother privacy to breastfeed their infants away from the chaotic surroundings in the relief camp. CDPOs and Supervisors will ensure that no other substitute of Breast Milk, Feeding Bottles are distributed in the camps.	CDPOs, Supervisors and AWW
3.	Child Friendly Spaces for children: Child friendly spaces are supportive environment that helps to address the educational and psychosocial well being of the children in relief camps. Such space provides safe environment for the children where they can indulge in organized activities to play, learn and express themselves and thus help them to cope with stressful environment. TLM, indoor games, story telling, charts etc can be incorporated in the space. CDPO, Supervisors, AWWs are the key persons to ensure setting up of child friendly spaces in the relief camp.	CDPOs, Supervisors and AWW
4.	Counselling on Menstrual Hygiene : AWW/AWH or supervisors will sensitize the women and adolescent girls in the relief camp about the importance of menstrual hygiene at the camps and discuss about the pros and cons of using different sanitary napkins when the access to water and sanitation facilities are available in limited proportion.	CDPOs, Supervisors and AWW
5.	Maintaining a record of bereft beneficiaries : Identification of eligible beneficiaries bereft of any service rendered under Women and Child Development Department as well as Social Justice and Equality Dept. and make necessary arrangement to enroll the bereft beneficiaries post the disaster period.	CDPOs, Supervisors and AWW
6.	Hot Cook Meal (HCM) for children : Community kitchen can be set up in safe and hygienic corner/place in the relief camp where HCM can be prepared and distribute to the children enrolled under the flood affected AWCs. Assistance from local Self Help Group (SHG) that is early by the relief camp can be taken to prepare HCM for the children. Supervisors will ensure the maintenance of hygiene in the community kitchen as well as disposal of organic and non organic waste in dustbin and other designated space provided at the relief camp.	CDPOs, Supervisors and AWW
7	THR for PM/LM and children (6-36 months): AWWs under the supervision of Supervisors will distribute Take Home Ration to the beneficiaries in the relief camp. CDPOs in consultation with the relief camp incharge will make necessary arrangement such as utensils, disposal required for continuation of complimentary feeding in the camp.	CDPOs, Supervisors and AWW
8.	Volunteers for Divyangjan and senior citizens: DSWO & CDPOs will depute either AWW/AWH or Volunteers from NGO to cater the needs of these special group of people.	DSWO, CDPOs, Supervisors and AWW
9.	Counters for food distribution: Separate counters for distribution of food to children, divyangjan, senior citizen, PM/LM will be ensured in the camps.	CDPOs, Supervisors and AWW
10	Psychological support: Trained Mental Health Professional can be arranged in collaboration with Health and Family Welfare Dept to provide counselling in the camp.	CDPO, Supervisors and Health Services

6.1.c POST FLOOD PREPAREDNESS

Sl no	Post Disaster	Key person
1	Flood damage report : Once the water level in the affected AWC subsides, the damage report along with estimate must be submitted duly signed by competent authority by the CDPOs within 5 days.	CDPOs
2.	Cleanliness drive: Post flood, the AWW/AWH will clean the debris and ensure that highest degree of sanitation and hygiene is maintained.	AWW/AWH

3.	Meantal Health Care : Children being the most vulnerable are more susceptible to mental health issue as a result of aftermath of disaster. Here collaboration can be made with Health Services to facilitate psychiatrist/ trained clinical psychologist to visit the flood affected AWC and interact with the children as well as their parents to assess any form of mental health issue in them and prepare intervention to deal with it if required.	Health and family Services/CDPOs
4	Special VHSND: List of beneficiaries PM,LM ,children and infants from the flood affected AWC who have missed their Ante Natal Check up , immunization due to flood will be prepared and forwarded to the Health services so that earliest arrangement can be made for them to avail the VHSND services.	CDPO /Supervisor/AWW

Role and Responsibilities

- District Level: SWD, LAKHIMPUR DISTRICT will be the point of coordination with District Administration, Emergency Officer, NGOs, and Media and will function as interface between the department and district & block level functionaries.
- Block level: CDPO will be the point of coordination with SWD, Lakhimpur District, BDO, Block AWWs, GPS & Village Goan burah etc.
- GP Level: Concerned Anganwadi Supervisors to coordinate with PRI members, AWW, ANM, and Village Gaon Burah.
- Village Level: AWW, Asha & Goan burah

Reporting & Monitoring Structure:-

- SWD, Lakhimpur District will collect and consolidate and entire report and share with higher authority with copy to Deputy Commissioner.
- CDPO,s will share details SWD, Lakhimpur District.
- Supervisors will share details on the disaster status and action taken with CDPO.

AWWs at the village level will details on the disaster status and action taken with respective Supervisors.

9.11 PWRD Lakhimpur, Ranganadi & Bihpuria Territorial Road Division.

The jurisdiction under the control of the PWRD, Lakhimpur, Ranganadi & Bihpuria Territorial Road Division is the entire Lakhimpur, Ranganadi ,Karunabari ,Bihpuria & Narayanpur Block of Lakhimpur District. The road works under this Division is decentralized by Three nos. of Sub-divisions such as Lakhimpur Territorial Road Sub-Division, Ranganadi Territorial Road Sub-Division & Bihpuria Territorial Road Sub-Division. Besides that, the jurisdiction of each sub-Division has not fetched the same topography/physiographic as well as oddly scattering the rivers and their tributaries. As a result, the major disasters like flood have occurred evenly throughout the jurisdiction of each Sub-division.

The rivers along with their branch and tributaries can hardly hold the large volume of water monsoon i.c. April to September which causes heavy and wide spread inundation named as flood. An extreme dynamic monsoon regime combined with unique physiographic setting of the basin of the Lakhimpur District has been considered as a single most important cause for frequent occurrence of flood in this district. Hence, the preparedness in this regards elaborates phase wise as hereunder by this division.

a) Pre Flood :

The Executive Engineer PWD (Roads) will visit generally the flood affected areas, which are within his jurisdiction and he will requested to all contractors under Lakhimpur, Ranganadi & Bihpuria Territorial Road Division by 30th March ensures that-

- The road –side materials like sand gravel, earth etc. is stacked in proper places so that they are not washed away during floods. At some locations, GCI roofing sheets ,tent, tarpaulins, bamboo, gunny bags, empty cement bags, kodaly, bucket, spade & shovels etc will be stored as ready materials.
- The passage of all cross drainage works (bridge/culverts/roadside drain) is Clear, free from obstructions to allow easy flow of the flood water.
- The protection works, as exist in culverts and bridges and road approaches flanking such structure will have been repaired as necessary.
- The bailey bridges , bull dozers, road rollers truckers and other vehicles of the division or the

listed contractors/suppliers are in good running condition.

v) Materials like bamboo/wooden/steel joists/equipments and tools for constructing temporary bridge and camps for P.W.R.D. workers are available in stock according to the limit prescribed by the Chief Engineer, P.W.R.D.

- Soundings are taken as necessary for structure, situated below the water level in March and necessary plan and drawings prepared for subsequent reference during floods.
- Assess and prepare list of staff of different categories for duties and make necessary arrangement.
- Arrange reserve stock of tools and plants and other stores at seals prescribed by the Chief Engineer, P.W.R.D.
- Departmental disaster management review meeting in every month will be held at the Division as well as Sub-Divisions and the minutes will be taken into consideration for effective measures.
- An investigation team under each Sub-Divisions will be set up with a leader of an Assistant Engineer/Junior Engineer along with Sectional Assistants/Muster roll workers for identification of vulnerable prone points. Any identification by this team will be consulted at the monthly review meeting and corrective measures will be planned accordingly.
- Training programme for the disaster response will be held by the Divisions and Sub-Divisions time to time advance knowledge and skills of the departmental staff.
- Train all the Technical persons including field staff, masons and labours for the methodology as mandated by the National Building Code,2005 and BIS code of practices for construction of seismic resistant structures.
- Impart mock drills/Table-top exercises/simulation exercises of the field staff.
- Plan prepare for some alternative routes to reach either side of the breached portion of the road.
- Conduct training of staff in latest advancements of engineering demolition techniques, health monitoring of infrastructure assets, seismic strengthening and retrofitting, critical infrastructure protection. Impart technical training, seminar, practical session to improve skill of the technical persons.
- Maintaining inventory list of all key points that can be mobilised for response and recovery efforts during flood.
- Distribution of leaflets and erection of hoardings to educate people and generate awareness regarding flood.
- All RCC structure like bridge, culverts has to be designed considering all seismic parameter as per IRC and MOST's code of practice.
- Protection of RCC bridges has to be done with boulder pitching, boulder apron at appropriate position.
- Repair of already flood damaged stretches.
- Construction of causeways in locations those are more vulnerable during breaching of river guide bunds to pass out huge quantity of flood water safely without damaging the communication network.
- Repairs of existing damaged culverts and construction of new culverts as per requirement.
- Carry out Non-destructive Evaluation (NDE) of RCC structures such a cross drainage works for distress identification and then adopt suitable measures as required for strengthening and retrofitting thereof.
- PWD has a strong group of qualified contractors those are well equipped with sufficient men power and construction machineries like road roller, truck, dumper, tractor cum trailer, excavator, water tankers etc. from whom we can also take the opportunity to utilize the services as when it necessary.
- AS an emergency preparedness measures, minimum stocks of man materials and machineries in each sub-division will be kept ready.

During Flood :

In this stage, the main efforts to be concentrated on restoration of communication and when disrupted as a war footing manner so that rescue, relief and rehabilitation works could be started without any delay to minimize loss of valuable life and property. The various scope of works under this category may be as follows.

On receipt of flood warning, the EE will—

- i) Under emergent condition keep constant and continuous contacts with the concerned Deputy Commissioner/Civil Sub divisional officers/Revenue Circle Officers/DDMA.
- ii) Alert his subordinate for response
- iii) Draw up tentative programme of the measures to be taken.

On occurrence of floods:

Active all the Teams for disaster response by EE cum Chairman, DMC

- i) EE will immediately visit the flood affected areas with his concerned AEE/AE/JE to the site.
- ii) District Control Room & Logistic Team (DCRLT) will assess requirement of materials and deploy staff for response activities. They will ensure sufficient arrangement of recovery vehicles, water tanks, road roller, excavator cum dozer etc.
- iii) QRT will Keep round the clock vigil of the roads, bridges, etc. which are threatened by the floods.
- iv) Technical Team will take action for restoration of Communication routes within the shortest time possible with all the National Highways, state roads and district roads. In case of village roads at least pedestrian traffic has to be restored.
- v) Technical team in consultation with local Circle Officer/OC of PS will keep proper vigil that no unauthorized cuts are made in P.W.D. roads for draining out of flood water.
- vi) Technical Committee will submit report to the Executive Engineer who in turn will report to Deputy Commissioner, DDMA, Superintending Engineer, Chief Engineer and Secretary, P.W.R.D. immediately after the occurrence indicating concisely the location, extent of submergence and closure of traffic etc.
- vii) Technical team will place the followings into service i.e. bailey bridge, vehicles (as available) for rescue operations and transhipment of marooned people, livestock etc. as may be required. They will also be responsible for construction of temporary foot bridges.
- viii) Quick Response Team will make necessary arrangement for engagement of labours and machineries to clear debris on road surface and on cross drainage structure. They will also take care of maintenance of road by spreading granular materials, soil etc. to restore the road communication and arrangement of earth filled cement bags mitigate damages at bridge approaches or to divert flow of water.
- ix) Technical team will prepare Plan & estimates for immediate restoration of damaged infrastructures and place it before DDMA for forwarding it to the Government (for SDRF)

Post Flood:

In this stage, the various scopes of work under the Divisional/Sub-Divisional offices includes:-

- Restore tools and plants.
- Repairs /replace damaged tools and plants.
- Collect materials if any lent to D.C. for creating temporary structures in relief camps.
- Take steps for repairs to damaged Roads, Culverts, Bridges and other structures borne in the books of P.W.D.
- Report to D.C., S.E., C.E., and Secretary, PWD as soon as after restoration of Communication and also intimate the expenditure/liability incurred thereof.
- Prepared detailed estimate which should also include the expenditure/liability incurred for restoration of traffic, giving the cost appraisal for restoration of the road surface/structures to the original condition and submit together with the statement in the proforma to the S.E. for onward transmission by the latter to higher authority in P.W.D./D.D.M.A. for obtaining sanction and arrangement of funds.

9.12 PWRD, Dhakukhana & Nowboicha Territorial Road division:

Objectives:-

1. Making aware the local people before occurrence of any flood.
2. Helping the human beings, other living creatures and protecting plants and property during flood.

Taking temporary restoration by the available recourses of manpower and machinery during flood as well as immediately after flood and to improve road connectivity to Head Quarter, health centers, relief camps etc.

2. Hazard & Vulnerability Scenario:

- Prevalent hazards under this Division are
 - Breaches of embankment of road by flood.
 - Wash way out of bridges, culverts by flood.
- The Lakhimpur district is situated in the eastern part of the state of Assam, on the north bank of mighty river Brahmaputra and foothills of the New Himalayan Region. This region experiences hot, humid & wet during summer while in winter it is cool & dry. So the climatic condition of this area is Tropical with high intensity of Rainfall.
- The average rainfall is above 1800mm per annum. So, whenever it rains on hills, flood water comes straightway to this region and causes severe damage.

3. Main Tasks of the Deptt:

- Pre-flood:
 - Awareness program, training & capacity building may be done with the collaboration of district Disaster Management Authority, Lakhimpur.
 - Resources of manpower & machinery will be provided in occurrence of any flood. But required materials such as bamboo, empty sand bags, sand, granular materials, SPT bridge materials etc. are not available under this division in stock. So, these materials are to be procured. But, the fund for training & procuring of these materials is required.
- During flood:
 - Breaching of embankment caused by flood is to be marked by bamboo.

Alignments of road embankment of overtopping road are to be marked by bamboo.

 - Small breaches, overtopping and erosion are to be protected by sand/earth filled bags.
 - Depressions on the road surface formed by the flood are to be repaired by granular materials.
 - Providing bamboo Foot Bridge.
 - Boulder protection will be done to protect erosion and wash out of bridges.
 - Temporary restoration of SPT bridges will be done with the available materials. (Materials are to be procured).
- Post flood:
 - Temporary and permanent restoration of damages caused by flood will be taken up by employing available manpower, machineries and materials immediately after flood.

4. Phase-Wise description of departmental responsibilities:

- The responsibilities of this department are on hazard-wise

Pre-disaster:

- Weak zone will be found out by field survey and the people of that locality will be made aware of the possibility of hazard.
- All the materials and machineries will be kept within the reach of hazardous area.

- During Disaster:
 - Helping the human beings, other living creatures and prevention of plants and property by keeping the connectivity and communication to the head quarter.
- Post disaster:
 - Temporary restoration will be taken up immediately and simultaneously processing for permanent restoration will be taken up in due permission from higher authority.

5. Programmes proposed within routine departmental works for flood prevention & mitigation and strategy for its successful implementation:

- The main hazard of this division is flood. So, wash way out of bridges, breaching of road occurs frequently during flood under the jurisdiction of this division. A proper survey may be done and the following program may be proposed:
 - New construction of bridges to provide sufficient opening for flood water.
 - Construction of causeways to avoid breaching of road embankment.
 - Protection of embankment at vulnerable stretch.

Operational Procedures:

1. The sectional officers will collect all the data of flood damages, breaching or overtopping of embankment, wash out of bridges etc. by engaging their sectional assistants. They will be responsible in finding out the vulnerable stretches. Materials to be required for vulnerable stretches may be stocked at nearby safe & accessible site before occurring of flood.
2. The sectional officers will be in contact with the concerned AEE for 24 hours and will take immediate action for temporary restoration with the available manpower and machineries with due permission from AEE.
3. The Assistant Executive Engineer will feed the Executive Engineer about all the information regarding vulnerable and affected stretches by visiting the site himself. He will take the permission for any action to be taken from the EE and will be implemented by the available man power and machineries.
 - i) Machineries will be engaged by collecting from the nearby site of Contractors.
 - ii) In emergencies contractor's manpower may be utilized with due permission.
 - iii) Available manpower and materials from the nearby stock will be utilized.
4. The Executive Engineer will monitor the entire network. He will take all the decision in consultations with district administration. But in case of emergencies the Assistant Ex. Engineer may himself take some decisions at the site. The Executive Engineer will help the field officers in collecting machineries by contacting Contractors. In emergencies he may arrange additional manpower, machineries and materials from the unaffected zones.

Manpower: Manpower of this division from Executive Engineer level to the Master roll labour will be engaged to combat probable flood.

Machineries: Machineries of the contractors, whose works are going on under this division, will be engaged as per convenience.

Materials: We don't have any materials in stock to combat flood. So, Materials required to combat probable flood are to be procured as early as possible.

9.14 SERICULTURE DEPTT:

Breeding and management of insect for the production of silk is Sericulture. Basically Sericulture is an agro-based cottage industry. In Assam Sericulture is indispensable which produces all the major four types of silk, i.e - Muga, Eri, Mulberry and Tasar. Hence, there are various host plants prevalent as per topography strikingly Som, Sualo, Kesseru, Castor, Mulberry and Oak tree.

In Lakhimpur district the most common host plant are Som Sualo, Kesseru, Castor, and Mulberry which promotes production of Muga , Eri And Mulberry Pat Silk.

1. Organisation: - The Department of Sericulture in Assam is headed by the Director of Sericulture and divided into several sectors in the districts. The Assistant Director is head of the district while Superintendent of Sericulture controls the Sub-division. There are many Farms and Centres like :-

Mulberry Farm	:-	for production of Mulberry Seed cocoons to produce quality silkworm seed.
Muga farms	:-	for production of Quality Muga seed cocoons & Basic Seeds.
Eri farms	:-	for production of Eri cocoons to produce commercial Eri Seed.

Flood Prone Area in the District:-

In case of Sericulture, damage of host plants like Som, Sualo, Kesseru, Castor, Mulberry plants etc occurs. Both juvenile and matured plants get affected due to continuous submergence and water logging. Soil erosion drain away the quality food plants more over flood affect directly the soil fertility.

Flood affected zone:-

Zone 1 - Dhakuakhana :
Dhakukhana and Ghilamara Block.

Zone 2 - Lakhimpur :
Telahi, Lakhimpur and Nowboicha Development Block.

Zone 3 - Narayanpur :
Narayanpur, Bihpuria, Karunabari Block.

If the flood comes during rearing period of Mulberry and Eri worms whole crop get spoil. Continuous rainfall affects rearing of Muga which purely out door and consequently fails. There is high risk of diseases and pest predators attack resulting crop loss.

Nature of Damage:

1. Damage to Som, Castor, Kesseru and Mulberry plantation both in juvenile and mature stage. Juvenile plantation totally died out Cohen submergence or water lodging is held due to flood, mature plantation get damage due to erosion and decomposition of root system.
2. Devastating damage to pre Seed Crop and Seed Crop rearing of Muga Silk Worm which is purely out damage on the som plantation.
3. Damage the Eri Silk Worm and Autumn crop Mulberry Rearing.
4. Damage to Silk weaving Sector.
5. Incidence of pest and disease to standing plantation and rearing, that escaped somehow.

Capacity of the Department to Deal with Identified Disaster

Sericulture department is having a well network for providing its services to victim or beneficiaries. But during natural Calamities like flood, storm, earth quake and disease epidemic the department network get disrupted.
